

LOW VOLTAGE SUPERVISOR

RESPONSIBILITIES

- Plan, organize, and direct activities concerned with implementation and maintenance of low voltage systems including access control and video surveillance
- Installation of fiber optics, copper, and conduit cabling
- Inspect and review projects to monitor safety compliance with NFPA, State, and Local Codes
- Build and maintain relationships with contract and management personnel, subcontractors, vendors, and client representatives

QUALIFICATIONS

- Experience and ability to create blueprints for various low voltage systems and make necessary recommendations for a fully operational system
- Ability to prioritize tasks, scheduling of projects and departmental reporting
- Proficiency with AutoCAD, Microsoft Project, Excel, Word, and Outlook
- Knowledge of NFPA, States, and Local Codes
- Familiarity with EIA/TIA and BICSI standards
- 3-5 years previous experience in Low Voltage field or commercial/residential IT
- Low Voltage, Video, Access Control, BICSI, OSHA Certifications a plus

Com-Tech, established in 1996, is one of the fastest growing Managed Security Service Providers in the United States. We specialize in the installation of cable infrastructure, conduit, access control, video surveillance, intercom, and other building systems within large commercial, industrial and critical infrastructure facilities.

We're looking to add qualified individuals to our team that have commercial electrical and low voltage installation experience. These positions are full time and long term. Excellent pay (including overtime and participation in bonus program) and benefit package. Pay based on experience and proficiency level.

OTHER QUALIFICATIONS

- Must have reliable means of transportation to and from the office and work sites
- Must be able to pass drug screening and background check
- Must be able to lift 50 pounds and stand for long periods of time
